Simpler, Faster!

- Easy enough for any skill level to assemble quickly, with fewer tools
- Fewer pieces and parts to inventory and track on the job site and in your warehouse
- Slide and connect cassette flooring eliminates screw-down flooring assemblies

More Adaptable!

- Accommodates the most challenging terrains, improving your upsell opportunities
- Add-on sections and create multiple floor levels, using only the TF2100 system
- Designed to work seamlessly with all mainstream tent manufacturers

Safer!

- Tent uprights integrate directly with floor connectors improving structural integrity
- Cassette flooring eliminates safety issues
- Excellent perimeter waterproofing, tent to floor design eliminates water creep
- Built-in safety code compliance: integrated tiedowns and shoring columns

Fewer Parts. Faster Setup. Substantial Labor Savings.

Here's why the TF2100 will be the smartest investment you'll make for your tent flooring solutions.

The TF2100 Scaffold & Plywood

Simple

An easy to understand modular system, engineered for code compliance — faster inspector sign-off

More Adaptable

Extremely flexible configurations and multi terrain adaptability

Faster

Significantly faster setup and tear down, allowing tighter scheduling and more projects

Waterproof Perimeter

The floor cassettes terminate at the sidewall line allowing water to shed to ground below

Fewer Parts, Fewer Tools

Fewer parts and tools to keep track of and simplified inventory on site and in your warehouse

Complex

Requires experienced carpenters who understand how to produce reliable, safe bracing systems — challenging inspector sign-off

Inflexible

Difficult terrain adaptability requiring significant ingenuity, time and labor

Time Consuming

Requires significantly more labor hours to both construct and deconstruct

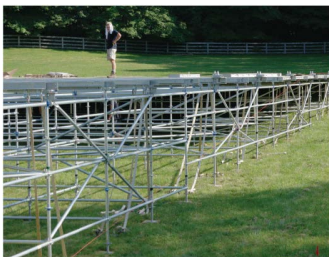

No Perimeter Waterproofing

Difficult if not impossible to waterproof along the sidewall line

More Parts, More Tools,

Requires more tools, parts, nuts, bolts and anchoring components on the job site and in your warehouse

The Genius of the Patented TF2100 is in the Details

Hills, terraces, even swimming pools are not a problem for the TF2100 adjustable system

Built-in tie-downs and tent upright shoring points mean safer, more secure installations

Integrated manufacturer's baseplates speed assembly process and eliminate the need to square the tent

No other tent flooring system assembles and disassembles faster, every time
